

Mahragan - Festival of GiveAways

[To Sign Up for FREE Downloads Click HERE.](#) Mahragan Giveaway, in my Cry this stands for "Festival" This is our First attempt at a giveaway event so we hope that we put on a very good event for all of you. The main purpose of our event is to do a couple of things. First we want to start to build a list of loyal clients that will be interested in our services and products, and second of all we wanted to give all of you an opportunity to get you very own product, or website, from our programmers and designers for a very good deal. We will talk more about that in just a bit here. My name is Sherif Ramadan Negm and I live in Nasr City, Cairo. I am the CEO of our Company <http://onlinesourcecode.com> and what we do there is we provide programmers and designers at a rate that almost anyone can afford. This allows you the beginner to compete with the big boys out there without you having to put up your house to get the money. Let me explain that just a bit for you. If you go to rent a coder and check the rates there for coders you will find anything from low of \$100.00 to thousands of dollars. In order to outsource good coders you can plan on paying a very good fee. But with our service you have the best of both worlds. You see in America coders require more money to do the same work that we can do. By outsourcing to outer countries you can plan on getting more bang for you buck.
